DETAILED ACTION

Election/Restrictions

 Claims 12-14 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim.
 Applicant timely traversed the restriction (election) requirement in the reply filed on 5/26/2005

2. Applicant's election with traverse of group I, claims 1-10 in the reply filed on 5/26/2005 is acknowledged. The traversal is on the ground(s) that claims 1-11 should be examined together. This is found persuasive because applicant has elected the species of armrest in the interview of 6/16/2005. Claims 12-14 remain withdrawn.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 1, 4-6, 8, 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Fillion et al.

Fillion et al. has substrate member 18 with target area 44 (figure 4B) of reduced thickness relative the remainder. Member 18 is a substrate in having a coating 43, col. 6, line 11.

As to claims 5-6, see foam backing member 24, bonded to underside surface, col. 3, line 62, claim 8.

As to claim 11, see backing member support 22.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
- 7. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Fillion et al. in view of Pokorzynski et al.

It would have been obvious to one of ordinary skill to provide in Fillion et al. a surface texture as taught by Pokorzynski et al. in order to form an aesthetically pleasing surface.

8. Claims 3 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fillion et al.

Reinforcing ribs and polymers are of common knowledge in this art, obvious to use to strengthen and for their material properties, respectively.

Applicant may traverse this and all other findings of judicial notice in timely manner in response to this office action. Applicant is reminded of the continuing

duty of disclosure under Rule 56 in this regard. Please specify exactly which claim

and which holding of judicial notice is being traversed.

"Injection moldable" is a process step not given patentable weight in a product claim.

9. Claim 9 is rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under

35 U.S.C. 103(a) as obvious over Fillion et al..

"Molding" is a process step not given patentable weight in a product claim.
